Meta- analysis of carried out studies in the field of Iranian of social problems

S. Moidfar, *Associate professor , Department of Social Sciences University of Tehran*
S. Parvin, *PhD student in sociology*

Abstract

Email: smoidfar@ut.ac.ir   :   *

Objectives: The study of social problems in Iranian scientific communities has been the center of attention in the past two decades. Understanding these problems needs contemplation and consultation with scholars. The meta-analysis of studies can help to recognize social problems in Iran.
Method: in this study, the method of research is qualitative meta- analysis. This method is to analysis studies
Findings: unemployment of university graduates is the most important problem in Iranian society. The perspective of social disorganization is the most important theorical perspective that has been used for explanation of social problems in Iran.
Results: considering the complex and multidimential social problems in Iranian society, understanding of these problems needs contemplation of scholar. theorical perspective of social disorganization from the viewpoint of authors of analyzed articles is the suitable perspective to find out and explain social problems in Iran.
  Keywords: meta-analysis, social problems, social disorganization, employment, youth problems
